NexaTech Incident Response Plan

Department: IT | Document type: Incident Plan

Fictional training content for a document-based RAG learning project.

1. Severity

SEV1 is a critical outage or active compromise. SEV2 is substantial service degradation. SEV3 is a limited impact issue

2. Roles

The incident commander coordinates response. The technical lead investigates. The communications lead prepares stakeholder updates

3. Containment

Containment may include disabling a credential, isolating a host, pausing a deployment, or restricting a network path

4. Recovery

Recovery requires validating service health, confirming data integrity, and monitoring for recurrence

5. Review

A blameless post-incident review should be completed within five business days for SEV1 and SEV2 incidents
